Re: Completed Mansard Roof Project

Dear Mr. Jacobazzi:

The River Shores Association, along with the Board of Directors would like to take this opportunity to thank your company for the roofing project just completed on our property. From the beginning, when we developed the contract with Richard Squire, through the end of the entire job that was supervised most competently by Mike Levine, we received professional and prompt attention to all our concerns. The Association office received many compliments from various unit owners stating that even though the workers were on our property for many months they were attentive to their jobs and respectful of people around them.

While your company does many jobs just like ours, this was a once in a lifetime project for our association. We most appreciated your patience in dealing with problems specific to condominiums, such as parking, as well as your employees having to deal with an entire Board of Directors. What could have been a costly and disastrous situation to our community ended up being a positive experience that enhanced the look and value of our property.

Again, thank-you for all Roofing Concepts has done for River Shores Association, Inc. Your field supervisor, Michael Levine, was most attentive to any situation or question that we had and we feel most fortunate that we were able to have him as our supervisor. We would not hesitate to recommend your company should the opportunity arise.

Sincerely,

Nancy Feenan, President  
River Shores Association, Inc.
